

iNPIPE PRODUCTS

DATASHEET – FOAM PIGS

Product Description and Functions

iNPIPE PRODUCTS™ Foam pigging tools are used for cleaning, swabbing, de-watering, product separation and drying.

iNPIPE PRODUCTS™ is the UK's largest manufacturer of Foam Pigs. With considerable in-house experience, *iNPIPE PRODUCTS™* are able to offer an operational advisory service to clients. This service ensures that all pigs supplied meet requirements as part of a progressive pigging programme or individual runs.

Standard Features

- Available in 3 densities of foam, Low (1.5-2lb/cuft), Medium (5-7lb/cuft) and High (8-10lb/cuft)
- Dual densities are available on request
- The range includes Bare foam, Criss cross, Silicone carbide and Wire brush
- Brush bristles available in Carbon, Stainless or Nylon material
- Manufactured to suit the clients specific pipeline internal diameter
- Can be manufactured to a specified length
- Pigs can be adapted to include transmitter housing, tow loops, gauge plates and magnets

Benefits

- Maintenance free, disposable product
- Capable of travelling up to 400km
- Able to traverse bends, mitres, tees and various valve configurations
- Can reduce through a pipeline by up to 25% in diameter
- Capable of negotiating short radius 90° bends
- elbows, minimum of 1D.
- Can be used on pipelines not originally designed for pigging activities
- Can be customised to meet client requirements
